Contract Financing

AFMC PGI 5332.703 Contract Funding Requirements

For release of solicitations in advance of funding availability, MAJCOM authorization for Contracting is delegated to the COCO.

SMC PGI 5332.7

Contract Funding

SMC PGI 5332.703 Contract Funding Requirements

See the [SMC/PK Guide to Contract Funding](#) for useful information.

SMC PGI 5332.703-2-90 Contracts Conditioned Upon Availability of Funds

(a) FAR 32.703-2 identifies a very narrow set of circumstances in which conditioning contract actions on the availability of funds is allowed. For most SMC actions, contracting officers should have a certified purchase request in hand before executing the contract action. A contracting officer may release a request for proposal (RFP) conditioned upon the availability of funds only when authorized under FAR 32.703-2 or when following the procedures in AFFARS MP5332.7.

(b) FAR 43.105 identifies one additional set of circumstances in which a contracting officer may execute a contract action without having first obtained a certification of funds availability, namely when the action is incrementally funded and a limitation of costs or funds clause is contained in the contract. However, in these circumstances the contracting officer should obtain written evidence that the funding is being reserved in-house by the program control office or that the program/requirement has been included in the President's budget as submitted to Congress and that, although not presently available, a reasonable expectation exists that funding will be authorized and available upon the enactment of the Authorization and Appropriations Acts. At SMC, this documentation is captured in a report from the Comprehensive Cost and Requirement System (CCaRS) tool. The CCaRS report should be included in Tab 1 of the contract file as evidence of funds availability.
